SIDEBOARDS | 20 mm thick fronts_Ecomalta®

Technical features

Structure and door in particleboard faced with ecomalta®. The inside of the sideboard and of the door is matt lacquered to match the ecomalta® finish.

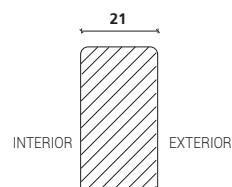

The ecomalta® is applied by hand in 6 different coats. Handicraft expertise and manual work create a unique and unrepeatable surface. **Therefore, any surface irregularity should not be considered a defect, but rather a distinguishing quality of the product.**

SIDEBOARDS | 20 mm thick fronts_Metallic lacquer

Technical features

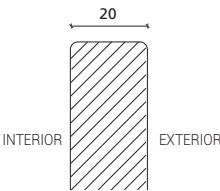

20 mm thick particleboard lacquered with a special coating containing metal particles. The end effect, achieved by means of various manual processes, looks like brushed metal with its characteristic colour variations that depend on the way light refracts on the surface. These characteristics are the result of processing an original material by hand which is why they can never become grounds for disputes.

SIDEBOARDS | 6 mm thick fronts_Stone_Patchwork

Technical features

MDF panels, matt lacquered interior and stone faced exterior. Stone consists of a thin layer of real stone that is glued onto a flexible acrylic fabric using polyester resins.

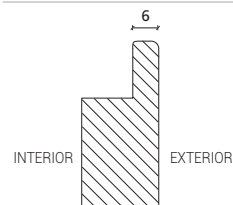

Its rough surface and the continuous changes in colour of the single layers make each front unique and unrepeatable. Any irregularities on the special handcrafted patchwork surfaces cannot be considered as defects because they are precious distinguishing features of real stone.

SIDEBOARDS | 6 mm thick fronts_Timewood

Technical features

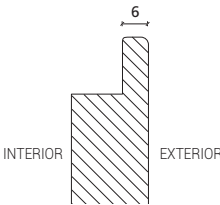

ATTENTION
Timewood solid wood is made from antique pinewood boards sourced from old houses, mountain huts and haylofts. The surfaces are varnished and protected using a special water-borne finish.
The particular shade will always be unique and unrepeatable because it depends on how time has modified the surface. Cracks, nail marks and warped parts are distinguishing features of this product.
The strength of these unique pieces lies in their imperfections and warped parts that contrast with the accuracy of the rest of the furniture they are applied to.
These characteristics distinguish wood as a living, original and natural material which is why they can never become grounds for disputes.

Sideboard opening methods

To calculate the total height remember to add the foot and its adjustment.

SIDEBOARDS WITH 1 SWING DOOR FOR EACH COMPARTMENT

Front:

- Openings: push-to-open swing doors
- Combinations: They are standard supplied with adjustable, H 14 mm concealed feet so that they can stand by themselves on the floor or on an optional methacrylate base or Stilo feet.
Can be provided with fixings to hang them to the wall. Check the actual load-bearing capacity of the wall before fixing these sideboards. It is necessary to use screw plugs (NOT SUPPLIED) suitable for the type of wall and for the load to be supported.
- Features: **The sideboards with methacrylate bases are provided with safety brackets that must be fixed to the wall.**
If requested in the double-faced version they can NEVER be used by themselves but must always be double, with their back panels attached.
The position of the doors cannot be changed.

SIDEBOARDS WITH 2 UNSYMMETRICAL SWING DOORS FOR EACH COMPARTMENT

To calculate the total height remember to add the foot and its adjustment.

swing door E F					154	218	242	242	266	305	305	305	442
price for each 20 mm thick band													
band A B C D					116	133	153	153	168	218			

- Example of the price calculation of a sideboard with a matt lacquered structure, an oak top and doors in various finishes:
- Use the price of the structure without fronts and top (includes glass shelves)
 - Add the top and doors in the desired finishes
 - For doors with central glass bands always remember to add the price of the two side bands (the glass band is included in the price).

sideboard code **DR392E**
