technical features of the | ZUKO BED

- Bed with a particleboard structure upholstered in fabric or Tecnopelle. The cover is always removable.
- Featuring a shaped headboard made of foam and bonded wadding upholstered in removable fabric or Tecnopelle. The front of the headboard is always upholstered in the same material used for the bed frame. In the dual coloured version the back of the headboard can be upholstered in a contrasting material, even in leather.
- The headboard is always finished on the rear while the front is highlighted by a set of vertical, stitched lines which match the upholstery.
- Since it is made out of a single piece of material, if it is in fabric or Tecnopelle, the back of the headboard is smooth with no stitching. In the dual coloured leather version the back of the headboard features vertical stitching because it is made by joining various pieces of material.
- The headboard stands on 10 mm high spacer feet.
- It is supplied with an integrated self-bearing slatted base with beech slats. 6 of these slats have rigidity regulators and 4 feature different degrees of firmness for differentiated shoulder support.

TECHNICAL DRAWINGS

NOTES: Supplied as standard with 220 mm high cylindrical feet in matt lacquer matching the bed-frame upholstery. They are also available with a metallic lacquered finish.

NOTES: The interior measurements refer to the space available for the mattress.

The size of the integrated self-bearing slatted base is smaller than the size of the interior space so that when the mattress is in place the underlying slatted base cannot be seen. For transport purposes, the integrated self-bearing slatted base is supplied unassembled, in two separate parts.
